

## How Many More to Make 60

Players 2

Game can be adapted to play individually

### Materials

- How Many More to Make 60 game board
- 13 colored counters for each player. Each player needs a different color.
- Paper clip and pencil to use as a “spinner”

### How to play

1. Player one spins to determine the number that represents the minutes past the hour on a clock.
2. Player one determines the number needed to reach the next hour (or 60 since there are 60 minutes in an hour). For example, if player one spins 45, a counter is placed on 15 because  $45+15=60$ .
3. The next player spins, determines the number that represents the minutes past the hour on a clock, player then determines the number needed to reach the next hour.
4. If a number is already covered, then that player’s turn ends without placing a counter on the board and play moves to the next player.
5. Players take turns until one player has 3 counters in a row horizontally, vertically, or diagonally.
